The third-party critical review report
No. V2025016-E

Mitsubishi Materials Corporation

Guideline of mass balance credit model for
copper products ; version 1.0 issued on January,
2026 in Japanese : March, 2026 in English

This guideline concludes that the application method for the mass balance credit model has been developed in accordance not only with the textual expressions of ISO 22095:2020 and ISO 22095-2:2026, but also with the underlying normative principles, taking into account discussions during the issuance of ISO 22095-2:2026.
